A natural world in miniature

COLLECTA®

Our Values

Safety, attention to detail, authenticity and excellence.

Our Vision

To create the natural world in miniature.

Our Mission

To inspire a love of nature and sense of wonder at its discovery of creatures, through our range of authentically detailed, hand painted miniature animal figurines.

To stimulate creativity, through sensory play and imagination, and to encourage curiosity about the natural world - play, learn, collect, develop.

To bring to life the prehistoric world and foster an understanding of the evolution and extinction of species. To highlight the importance of protecting our endangered species and their habitat.

To bring the highest standards of craftsmanship, materials and safety to our collectable range. The play models are solid, safe in water, and dishwasher proof, ensure they are hygienically safe.

Horse Country

Deborah McDermott

Deborah is a sculptor living in Southern California. As a sculptor, she observes the anatomy, movement and expressions of horses as well as their unique qualities that make each horse an individual.

Deborah McDermott

Prehistoric World

Sadly, our dear friend and colleague Anthony Beeson passed away last year. Anthony's unbounded enthusiasm, energy and inspirational ideas have been instrumental in the development of the award-winning CollectA Prehistoric World range. CollectA will continue to develop innovative and beautifully designed prehistoric animal figures. Anthony's dedication and passion for creating accurate replicas will permit his legacy to live on reflected in CollectA's continuing mission to educate, inform and to provide the greatest amount of creative play through the provision of highly accurate models.

A total of ten new prehistoric figures are being introduced this year. The CollectA Prehistoric World range highlights the amazing variety of creatures that once existed on planet Earth and this year's introductions maintains the trend of providing figures that represent animals from the breadth and depth of geological deep time.

A replica of Hadrosaurus, the first member of the Dinosauria to be described from fossils found in North America and the first duck-billed dinosaur to be named is added to the Popular Age of Dinosaurs range. This Late Cretaceous herbivore will be joined by another replica of an iconic North American, Late Cretaceous dinosaur, a model of Triceratops horridus.

More recent dinosaur fossil discoveries have been included in the Popular range. The herbivorous Brighstoneus and the spinosaurid Ceratosuchops both formally scientifically described in 2021 - two dinosaurs from the Isle of Wight, off the coast of southern England. The fishing Ceratosuchops model has an articulated jaw.

Joining the dinosaurs in this range will be a replica of Shastasaurus, a primitive ichthyosaur from the Late Triassic. Several species have been named and described including Shastasaurus sikanniensis, which, with an estimated length of over twenty metres is one of the largest ichthyosaurs known to science.

There is also a new marine reptile model in the CollectA Deluxe series, a 1:40 scale replica of a Mosasaurus, this model too will have a movable jaw, complete with pterygoid teeth towards the back of the mouth. The pterygoid teeth helped this apex predator to grip its victims and aided in the movement of prey down its throat.

The CollectA Deluxe series will also include two new dinosaur figures in 2023. A 1:6 scale replica of Stegourus, a small, armoured dinosaur with a formidable tail club, unlike any other known dinosaur tail weapon. Stegourus was formally named and scientifically described in 2021. The other new CollectA Deluxe dinosaur is the 1:100 scale Ruyangosaurus, a replica of an enormous titanosaur, which roamed China during the Early Cretaceous. With a body length in excess of thirty metres, Ruyangosaurus is one of the largest dinosaurs ever discovered in Asia.

CollectA's Other Prehistoric Animals range reflects the company's desire to highlight the astonishing variety of prehistoric life. A replica of the ancient, marine invertebrate Anomalocaris, thought to be one of the first apex predators to evolve, is added to this range. In addition, CollectA have introduced their first ever model of a prehistoric amphibian, a Deluxe Koolasuchus, a model of a giant, predator which inhabited Australian rivers during the Early Cretaceous. It was the last of its kind, its closest relatives became extinct at least fifty million years earlier.

Plans are well-advanced for further exciting prehistoric animals to be introduced into the award-winning CollectA Prehistoric World range for 2024.

Matthias Geiger

Matthias is a German sculptor with a great passion for Dinosaurs. In collaboration with Anthony Beeson and other consultants, he brings life to CollectA's vision of prehistoric animals.

All our models are individually hand crafted to the highest standards and made with only the finest and safest materials. As part of our ongoing product improvement program, we continually strive to improve and upgrade all our models in an effort to bring you the best possible collection. All our products are rigorously tested to ensure they meet the highest safety standards. We hope you enjoy our models as much as we have enjoyed creating them.

Building a natural world in miniature for collectors.

Anglerfish

L 12.8 x H 6.4 cm
L 5 x H 2.5 in

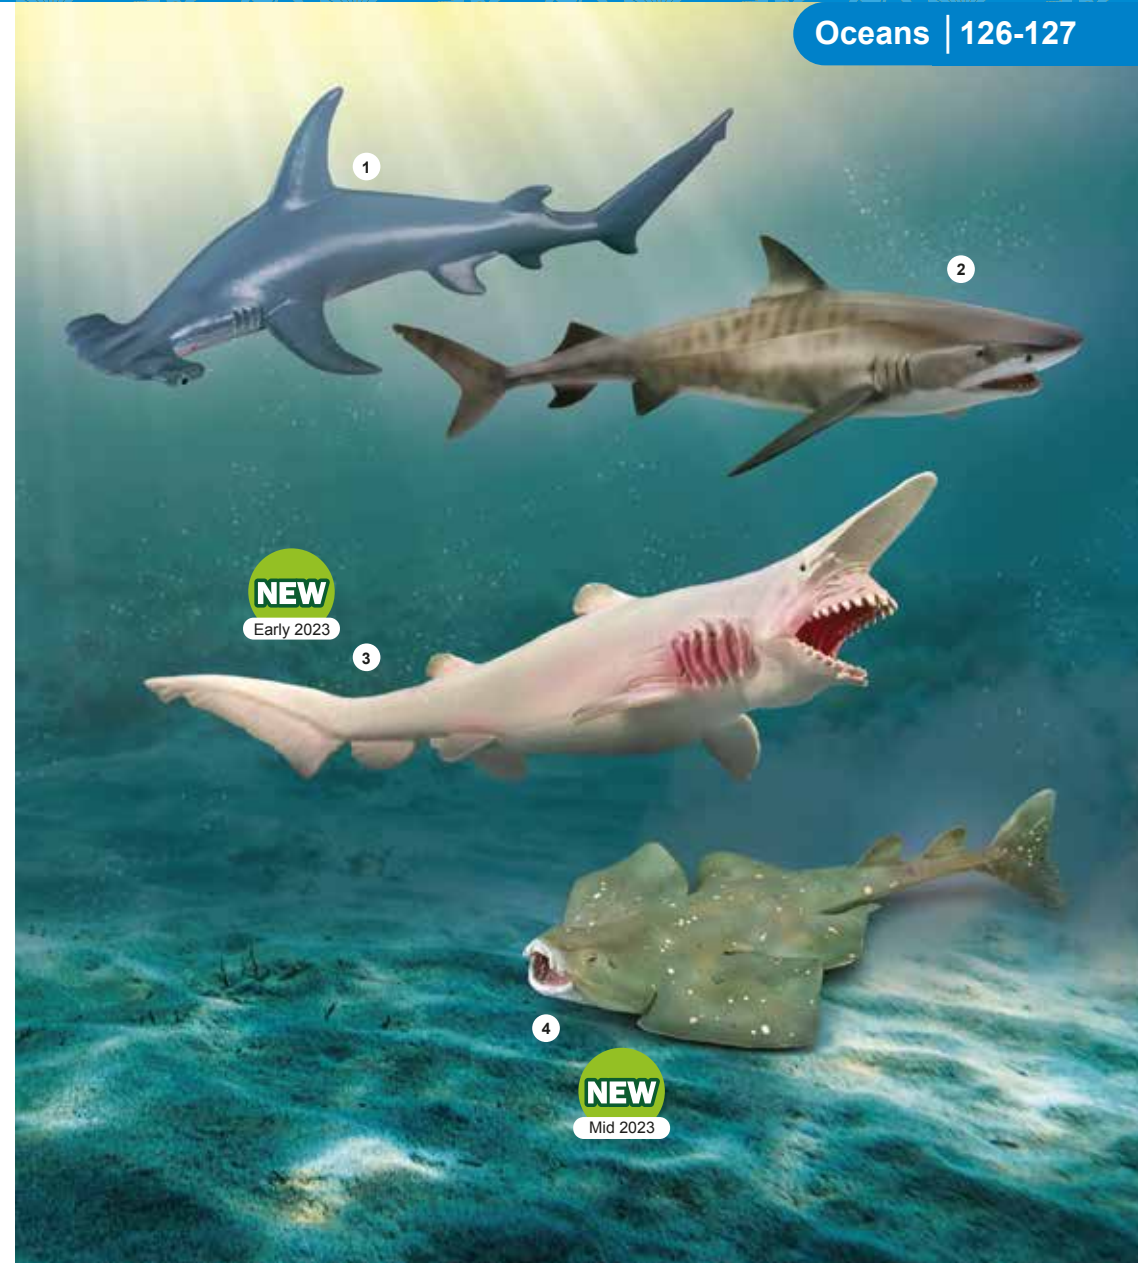

The female has a piece of modified dorsal fin ray that protrudes above her mouth like a fishing pole and can illuminate itself. The male angler fish is much smaller compared with the female and not equipped to eat. He lives as a parasite onto the female and solely for fertilizing her eggs.

In Celtic and northern European folklore, the unicorn is depicted as a white horse-like animal with a long horn.

In the middle ages, it was commonly described as an extremely wild woodland creature, a symbol of purity and grace

Celtic Family Symbol

The Celtic symbol made up of three conjoined spirals in rotational symmetry is called Triskelion and means "three legs". This Triple Spiral represents the family as mother-father-child, eternity as life-death-rebirth and past-present-future. It also represents the three Celtic worlds: the spiritual world, the present world and the celestial world.

The Tree of Life

It is a representation of harmony and balance in nature. The Tree of Life symbolized strength, a long life, wisdom, and rebirth. The Celts also believed that they actually came from trees, and considered them magical, living beings. Trees were said to guard the land and acted as a doorway into the spiritual world.

Celtic Knot

This pattern represents the interconnection of life and our place within the universe. Celtic knots are referred to as endless knots due to the fact that they do not have an end or a beginning. The endless knots represent the eternalness of nature.

Sailor's Knot

This design features two intertwined ropes and may have been created by sailors during their long voyages as a means of remembering their loved ones. The Sailor's knot is symbolic of friendship, affection, harmony and love.
