

Welcome to the 2014 catalogue

This year's range represents a coming of age for Mojo. We have taken a look across the range and created an even broader, higher quality selection which we hope will have elements that appeal to everyone.

We started Mojo with the aim of producing the very best models available and we are constantly looking at ways to achieve the highest accuracy in both sculpting and colouration. This process will become our mantra for the ensuing years. We will strive to be the best by refusing to accept anything less in terms of accuracy and quality. If we believe we can always do better, we will achieve what we set out to do... produce the finest animal figurines available.

The range of models for 2014 comprises many diverse species, some rare and exotic whilst others are more easily recognizable. We are happy to present the new

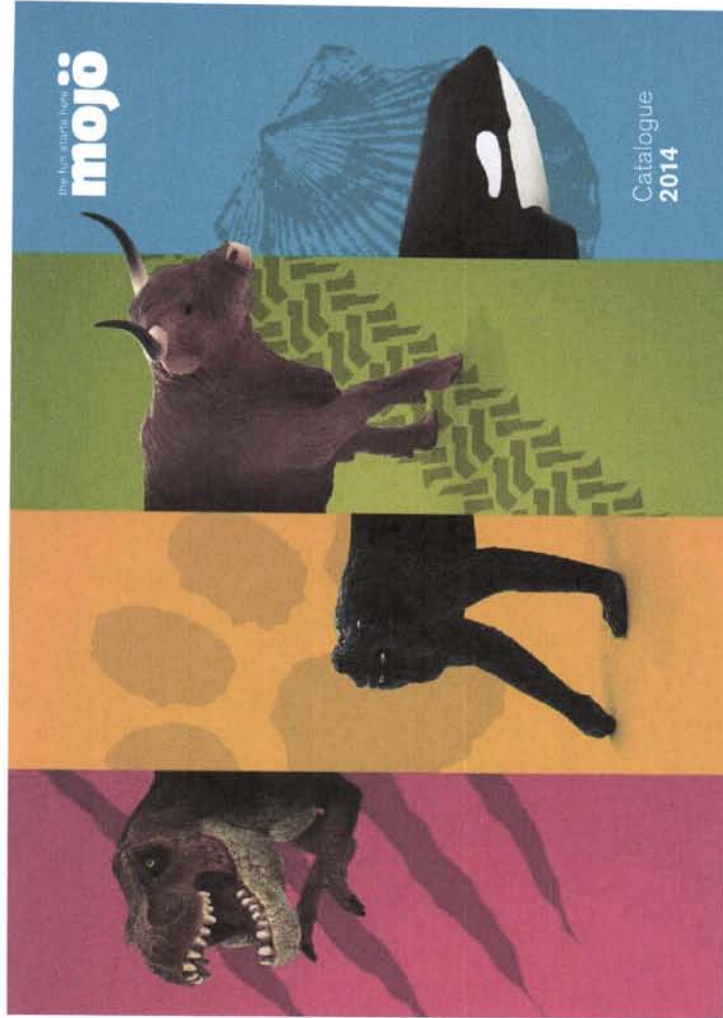

Male Lion and Lioness, Zebra and White tailed Dove, all having been re-modelled for 2014. Along with some more unusual species for the coming year such as the Sun Bear and Indian Pangolin 2014 will also see our first foray into the fantasy and figurine market. We thank you for your love and hope you enjoy Mojo's 2014 collection.

Thanks

We would like to thank Anna for her beautiful work on the Figurine in Cow, Asian Mare in Red and Saddle, Pig and also Chris for his help with the Sun Bear. We would also like to thank Chris for his excellent critique and assistance on the Indian Pangolin along with his enduring belief and support since our first launch in 2011.

Did you know?

The Fjord Horse, or Norwegian Fjord horse to give it its correct title, is one of the oldest and purest horse breeds in the world. Native to Norway the Fjord Horse is believed to have been first domesticated some 4,000 years ago and was used by the Vikings as War Mount. Prized for its good temperament, character and strength this beautiful horse is one of the national symbols of Norway.

Did you know?

Measuring some 12 meters long and standing 4 meters high at the hips, T-Rex was one of the largest known land predators.

With running speeds of up to 40kph (25mph) and teeth some 30cm long, this would have made T-Rex a formidable hunter.

Wildlife

Did you know?

White Tigers are actually a rare colour variation of the Bengal Tiger. Although sometimes mistakenly thought of as a Siberian Tiger, this is not the case as to date no White Siberian Tiger has actually been recorded. Whilst extremely rare in the wild they are selectively bred due to their popularity and several hundred are currently in captivity.

Did you know?

The two-toed sloth, or to give it the correct name Linnaeus's two-toed sloth, inhabits Central and South America.

Two-toed sloths derive their name from that fact that they have 2 toes on their fore feet whilst having 3 on their hind feet (as with all other sloths).

They are unable to shiver in order to keep warm and have an extremely slow metabolic rate which results in food taking up to one month to digest.

Did you know?

The Great White Shark is the largest member of the Shark family and is the ultimate apex predator of the seas, having no natural predators. They can reach a length of some 6m (20ft) and weigh up to 2000kg with a lifespan of around 30 years. They inhabit many coastal and offshore waters with higher populations found in the United States, South Africa and Japan, preying on Fur Seals, Sea Lions, other species of sharks and larger fish.

Innovation and reliability

We believe establishing long-term relationships is key to the future of our business. To build the very best reputation for innovation and reliability we focus on the quality of our products and services, and the excellent customer care we work hard to provide. We take heed of and value all feedback.

Craft and expertise

We craft each animal in the Mojo range over a period of many months, from the initial design and sculpting through to the final processes of colouration and painting. We expertly research every detail to recreate as close to nature as possible the animals and creatures children know and love.

Safety and standards

The safety of children is of paramount importance to us in developing our products. Every animal in the Mojo range is rigorously tested and must fulfil all current worldwide safety standards before being introduced to the market.

European standards

EN71 Part 1, 2, & 3, EN71 Part 9, DIN53160 (German standard), Cadmium & Non-Phthalate.

US Standards

ASTM F963-11, CPSIA, Lead in surface coatings, Lead in substrate, Non-Phthalates, US Public Law 110-314, Assembly Bill of California AB1108 & Cal Prop 65.
