

Welcome to Mojo 2015

As we approach our fourth year at both Hong Kong and Nuremberg Toy Fairs we are looking to widen the appeal of our products by the addition of some new and innovative ideas, whilst hopefully at the same time creating awareness of Mother Nature's diversity and beauty.

Over the past three years we have seen the range grow both in sales and popularity, being widely accepted as a credible alternative to many of the more established brands currently available on the market.

In order to build on our growing reputation as a manufacturer of high quality figurines this year we will see a number of new products as well as numerous updates and modifications to existing products in order to raise our quality to an even higher level.

Specifically for 2015 we would like to highlight our new fantasy Dragons and Princess figurines, a new range of Dinosaurs and some upgrades to the current range including new models of the African Elephant and calf along with a new Texas Longhorn Bull.

Our Horse and Farm series also benefit from new figures with additional Cattle and Horses added to the line-up for 2015.

The coming year will also see two exciting new concepts which we hope will complement our traditional range of figurines.

Mojo-Minis

A range of 20 mini figurines measuring approx. 2cm in size. As a result of the success of the money made up for in the quality. The first series comprises 10 Dinosaurs and 10 Wildlife models. Collectible and pocket sized, these figures represent a change in the approach to Mojo figurines proving that you don't have to sacrifice quality to price. We are currently preparing the next stage in this exciting range and look forward to revealing more in the coming months.

Play-Scape Backpacks

A completely new concept in play-sets. Our Play-Scape range is now supported by a range of Play-Scape figurines, whilst also incorporating a storage area for the figurines. Launching in April 2015 the first two Play-Scape's will follow a Dinosaur and Wildlife theme.

Thanks

We would like to thank all our customers for their strong support and during the past three years and look forward to a long and happy future together as the range goes from strength to strength.

Also as ever thanks go to Anna for her work on the Texas Longhorn Bull, Sarah on the Cow, Stalled Piggy & Foal together with the Tinker Mare and Otter Trotter. Finally a big thank you to everyone who has purchased our products, we wait for you to know it's very much appreciated and never taken for granted. Thank You!

Did you know?

The Fjord Horse, or Norwegian Fjord horse to give it its correct title, is one of the oldest and greatest horse breeds in the world. Native to Norway, the Fjord horse is believed to have been first domesticated some 4,000 years ago and was used by the Vikings as War Mounts. Prized for its good temperament, character and strength this beautiful horse is one of the national symbols of Norway.

Did you know?

Measuring some 12 meters long and standing 4 meters high at the hips, T-Rex was one of the largest known land predators.

With running speeds of up to 40kph (25mph) and teeth some 30cm long, this would have made T-Rex a formidable hunter.

Did you know?

Red Squirrels shed their coats twice a year, switching between a thinner coat in summer and a darker, thicker winter coat. They also do not hibernate, but bury plentiful supplies of seeds and nuts in the ground to eat in the winters.

Did you know?

Because they live in tropical temperatures, Sun Bears do not need to hibernate and are able to mate at any time of year. The long sharp claws of the sun bear are handy for tearing open trees where insect and bee nests can be found and slurped up using their extra-long tongue.

Did you know?

The two-toed sloth, or to give it the correct name Linnaeus's two-toed sloth, inhabits Central and South America.

Two-toed sloths derive their name from the fact that they have 2 toes on their fore feet whilst having 3 on their hind feet (as with all other sloths). They are unable to shiver in order to keep warm and have an extremely slow metabolic rate which results in food taking up to one month to digest.

Fantasy & Figurines

Did you know?

The Great White Shark is the largest member of the Shark family and is the ultimate apex predator of the seas, having no natural predators. They can reach a length of some 6m (20ft) and weigh up to 20,000kg with a lifespan of around 30 years.

They inhabit many coastal and offshore waters with higher populations found in the United States, South Africa and Japan, preying on Fur Seals, Sea Lions, other species of sharks and larger fish.

Innovation and reliability

We believe establishing long-term relationships is key to the future of our business. To build the very best reputation for innovation and reliability we focus on the quality of our products and services, and the excellent customer care we work hard to provide. We take heed of and value all feedback.

Craft and expertise

We craft each animal in the Mojo range over a period of many months, from the initial design and sculpting through to the final processes of colouration and painting. We employ research, every detail to recreate as close to nature as possible the animals and creatures children know and love.

Safety and standards

The safety of children is of paramount importance to us in developing our products. Every animal in the Mojo range is rigorously tested and must fulfil all current worldwide safety standards before being introduced to the market.

European standards

EN71 Part 1, 2, & 3, EN71 Part 9, DIN53160 (German standard), Cadmium & Non-Phthalate.

US Standards

ASTM F963-11, CPSIA, Lead in surface coatings, Lead in substrate, Non-Phthalate, US Public Law 110-314, Assembly Bill of California AB1108 & Cal Prop 65.
