

**ANIMAL
PLANET**

Catalogue
2019

Welcome to the Animal Planet 2019 collection!

Our range for 2019 follows the theme of the past few years. Raising both the quality and diversity of the product range whilst also upgrading and making improvements to older models.

The new catalogue design and layout is not the only difference you will find for 2019.

Our Dinosaur range sees an upgraded and improved Triceratops as well as the additional models of Dunkleosteus, a large prehistoric river fish noted not only for its size but its rather terrifying bite! As well as Tropeognathus, a large flying dinosaur from the Cretaceous period with a wing span of up to 8 meters or 27 feet.

Given our success over the past couple of years with snakes, this year sees the addition of a Coral Snake, which will join our popular Rattle-snake and King Cobra. Additionally, we will launch our first arachnid, a Red Kneed Tarantula.

Further additions for 2019 include a new remodelled Crocodile with an articulated jaw as well as a Hanoverian Mare for the Horse collection and a Mallard Duck. Completing the 2019 range are a Reindeer and Calf, an Oryx and some Japanese inspired felines.

2019 will also see the official launch of our Keyring range, though they had a soft launch in mid-2018, they proved to be extremely popular. As a result, they will now become a permanent feature.

We hope you enjoy the 2019 collection from Mojo and we thank you for your continued support.

All feedback is gratefully received, valued and noted, so if you have a comment or suggestion please e-mail us at fun@mofofun.eu

We look forward to hearing from you.

Hyenas and lions cover the same ground, hunt the same prey, and scavenge the same remains of animals. Lions will also kill hyenas, but enough hyenas can be a pretty solid threat to lions – able to steal carcasses or kill their cubs.

Apart from ringed seals, polar bears also consume bigger prey animals such as whales. But they do not seem to actively hunt live whales. Depends on the location, ice bears love to feed on whale carcasses. Bears often smell whale carcasses miles away and begin to feed in groups.

Giganotosaurus is thought to have been one of the largest theropod dinosaurs, but the incompleteness of its remains have made it difficult to estimate its size reliably. However, it may have been larger than Tyrannosaurus, which is considered the largest theropod historically.

Our Goal

To create the finest quality products available.
To offer First Class Customer Service
To be customer focused, whether Business or Consumer.
To build long term partnerships based on Quality, Trust and Confidence.

Craft and Expertise

Designed in the UK, our products are made with passion. Passion for design, passion for realism, and a passion for quality. Each figure is expertly researched prior to its manufacture.

The sculpting and coloration processes can take many months and even then, some do not make it into production. Once in production, we may re-fine a model many times until we feel it reaches a level of quality with which we are happy.

Mojo, a passion for perfection!

Safety and Standards

Each Mojo product is rigorously tested to a wide range of international standards. This is an ongoing process with every model in the range undergoing safety testing on an annual basis.

We value safety above all else.

European Standards

EN71 Part 1, 2, & 3, EN71 Part 9, DIN53160 (German standard),
Cadmium & Non-Phthalate.

US Standards

ASTM F963-11, CPSIA, Lead in surface coatings, Lead in substrate,
Non-Phthalate, California Prop. 65

China Standard

China Compulsory Certificate (CCC)

Japan Standard

Japan Food Sanitation Law (JFSL)

Saudi Arabia Standard

Saudi Arabia Standards Organization Certificate of Conformity (SASO)

Middle East Standard

Gulf Cooperation Council Conformity (GCC)
